

ELS

we mark your product

“ We develop the perfect solution for your requirements – because we listen to you.”

Simply outstanding:

Labelling systems and solutions from ELS, the leading specialist

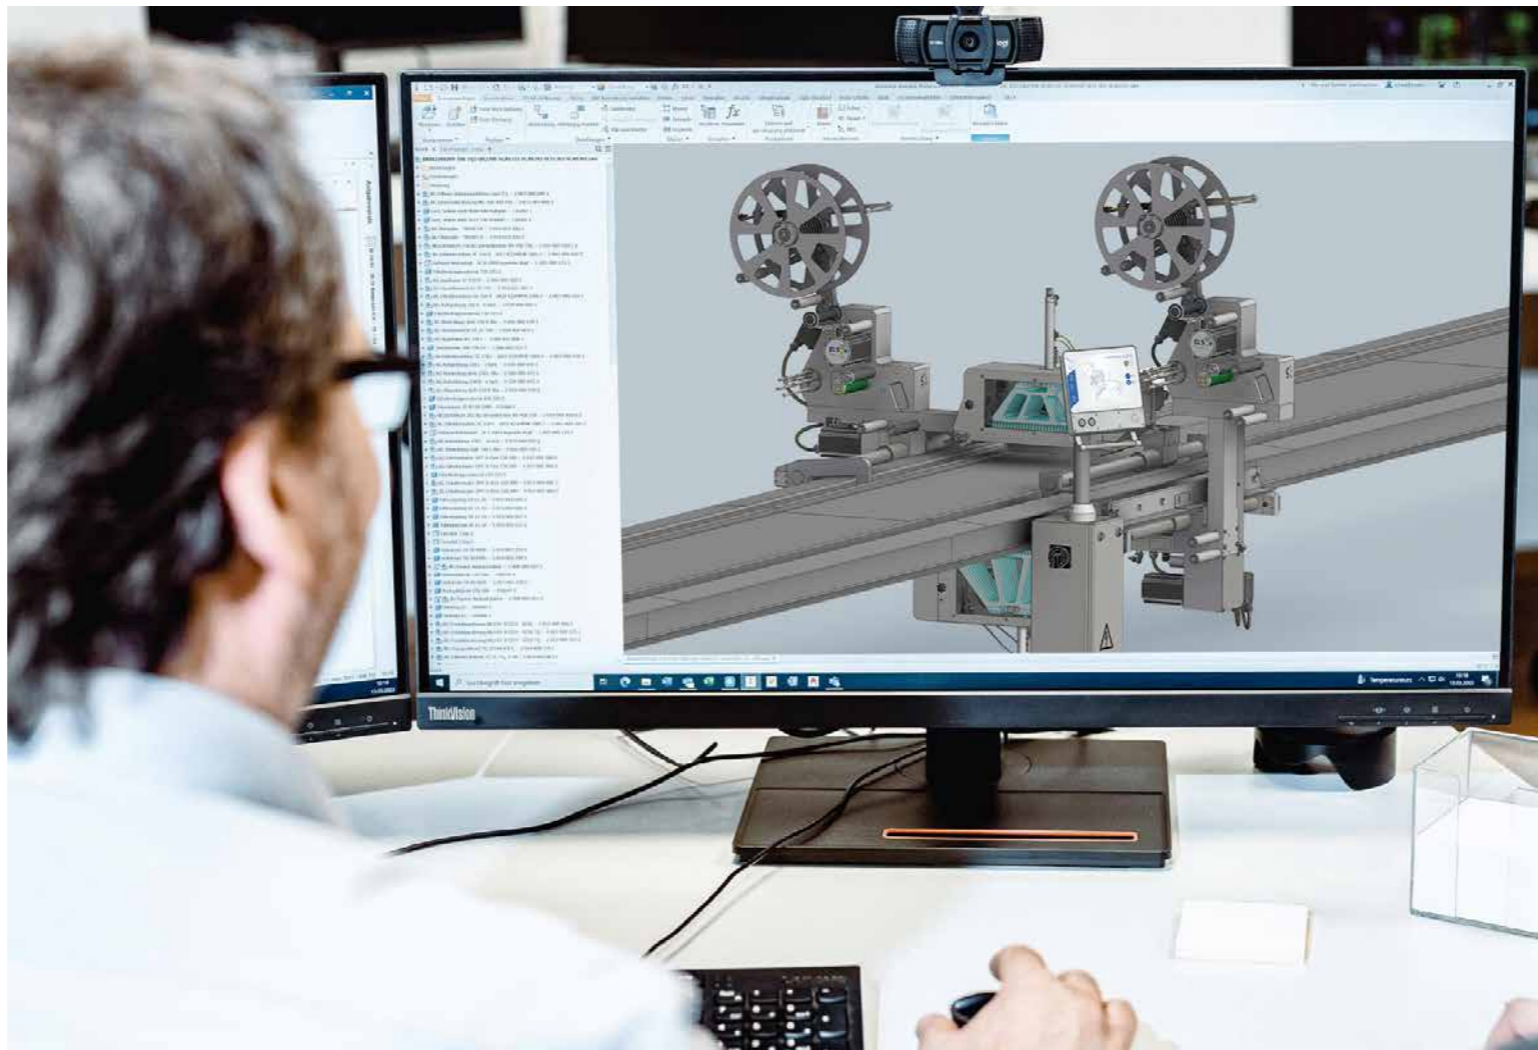

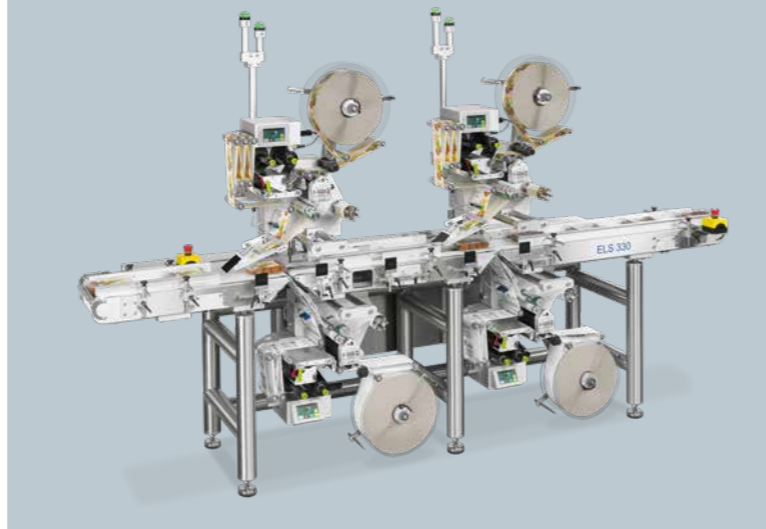

Flexible labelling solutions with real added value

Packaging systems are becoming ever more complex and have to meet increasingly greater requirements. They need to be **highly productive** in operation, **simple to use** and remain **efficient for a long time**, as well as providing maximum machine availability. The modular labelling systems from ELS master all these challenges.

Individual solutions for every requirement

ELS is among the world's leading manufacturers of labelling and printing systems, and it is represented in most countries of the world. Since 1998 we have been providing an important contribution to making products of all types ready for sale and fit for the market. Our labelling and printing solutions can be integrated very flexibly into every **packaging machine** and **production environment**. They can be used in companies of all sizes and in all sectors. For example in the food, non-food, medical, pharmaceutical and automotive sectors, as well as many more.

- Plug & play solutions for integrating and replacing individual modules
- Design of customised equipment thanks to a modular building block system
- Large selection of compact labelling systems for every area of use
- Utilisation of components that meet the latest industry standards
- Proven in thousands of cases – and in many well-known companies

Very high level of machine availability and efficiency

Products from ELS are developed with a view to maximum productivity, efficiency and sustainability. They are particularly durable, and even after many years they can easily be adapted for new requirements. **Even existing equipment can be retrofitted cost-effectively with flexible solutions from ELS.**

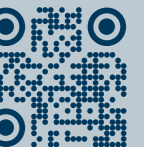

- Durable and efficient systems with a high level of overall equipment efficiency
- Rapid amortisation thanks to faultless operation with low personnel and maintenance costs
- Fast availability of spare parts for maintenance and service work – 85% of all parts can be delivered within 24–48 hours
- Future-proof investment with a very high level of cost-effectiveness thanks to a long lifespan and ease of retrofitting

Unique and inclusive service

As an experienced partner to industry, we offer our customers and other business partners a high level of trusting collaboration on an equal footing. Our team in Werther, as well as our sales partners in 35 countries worldwide, will support you with first-class service at all stages – from the initial planning through to machine commissioning and right up to the maintenance of your equipment. Quick and reliable service, preventive maintenance, and immediate availability of genuine spare parts.
